

Motor Inspections.co.uk

www.motor-inspections.co.uk select GlassMatix and associated core products as the preferred route of reporting in their launch to UK and Eire Market.

Mick Walker from motor-inspections.co.uk told Glass's Information Services that "*there has be a real gap in the market for an integrated solution such as GlassMatix to allow the modern day motor engineer assessor to manage his business in a more professional manner*".

Walker has much experience of the business after running his own Bodyshop, and benefiting from key positions at a work provider and a large independent engineering company in the past, along with commercial and PSV experience at a hands-on level. His system knowledge is key to the success, and he explained to Glass's that he went to great lengths when selecting a product that would service the needs of his business, his engineers, and indeed his clients.

Motor-inspections.co.uk utilises a new online engineering and reporting service for clients called Mldata-net, which allows secure access of reports and workflow for engineers, insurers, brokers and fleet managers alike.

Walker added "with the integration work carried out with GlassMatix 4, and the resilient service it offers our business, we can be sure that we are not left without the relevant information when we need it, which can affect our business, and indeed our customers business dramatically"

David Punter (Key Account Manager for Glass's) said "it was always good to receive feedback from technical claims personnel endorsing Glass's products and solutions as the preferred choice, as it is all too easy to be led along a path that does not always suit all.

About motor-inspections.co.uk :

www.motor-inspections.co.uk was formed in 2010 to align the vehicle assessment market in the UK and Eire with the offer of real time inspections, and engineering services. The company is underpinned by the Mldata-net service which allows real time access on reporting and workflow to ensure people know what they need to know at any given time. Motor-inspections. co.uk are always looking for engineering partners across the UK, and now is a great time to contact us as we move forward into the UK and Eire market making a difference and delighting our customers.
